Wet dogs and rotten eggs

Do you want to enhance your spa experience with aromatherapy? If a hot tub is left unopened for lengthy periods of time, you may experience an undesirable aroma. Sometimes when the chemistry is out of balance you may also get a unique smell. If your water is just fine, it's okay to use aromatherapy too! Spa scents come in liquid or granule forms to make the water smell pleasant. They are most likely pungent for one use, then add again on your next use. There are many different scents to fit even the pickiest of noses!

Email sales@swimmingpoolservices.com with any questions regarding aromatherapy or any tips that you would like us to address in the future.
