How to prevent Old Man Winter from wreaking havoc on your spa cover

Monitor your spa cover for excessive snow. Carefully brush off the cover after snowfall to ensure the longevity of your cover. Do not use any snow melting agents on cover as they will damage the material and void your warranty. Is your spa cover in good shape or does it weigh so much it takes the whole family to get it off? Replacing a spa cover can be a painless process. There are several options available to help you . Generally a factory replacement is the best option because it fits your spa like a glove. The skirt will be the same length and the tie downs will be in the same spot. ALL INTERNET COVER MANUFACTURERS MAKE A COVER WITHIN AN INCH OF THE DIMENSIONS YOU PROVIDE THEM. Internet covers are always less expensive but they never fit like the original. UPS does not deliver covers either, so any internet site will use a freight liner and trust us, they loath residential deliveries! Working with an authorized retailer always yields the best result.

Email sales@swimmingpoolservices.com with any questions regarding new spa covers or any tips that you would like us to address in the future.
