Stop putting off the small stuff

Are your spa accessories weathered and not working well? Periodically inspect your step, cover lift, pillows and drink trays to make sure they are in working order. Cover lifters can loosen causing the unit to perform incorrectly. Tighten bolts and adjust fittings as needed. Check steps for proper corrugation on the top to prevent someone from slipping. Replace pillows as they wear and fade to ensure no pieces fall into the water and clog your spa filter. Accessories are easy to check and usually easy to replace.

Email sales@swimmingpoolservices.com with any questions regarding spa accessories or any tips that you would like us to address in the future.
