Let SPS teach you how to vacuum underwater

Do you ever get grit, sand or debris in the spa and just can't seem to get it out? Sometimes moving in and out of the spa, or the kids, track fine particles of debris into the spa and they are an eye sore. Available to aid in removing this are manual hand vacs, battery powered hand vacs and handheld Grit Gitters. The Grit Gitter fits in your palm and pulls debris into the handle in a matter of seconds. Manual vacs have handles and require the user to pump the handle to get dirt in the chamber. Battery powered vacuums are similar to dust busters, but they work underwater. Getting debris out of a spa is quick and easy, if you have the right tool!

Email sales@swimmingpoolservices.com with any questions regarding hot tub vacuums or any tips that you would like us to address in the future.
