Iced tea in your spa

Does your water look like iced tea when filling your spa? Attempting to clear and balance this mess will cost you time and money. Try using a pre filter on the end of your garden hose while filling the spa. The pre filter will catch most of the contaminants before they reach the vessel. Balancing the water will be much easier when using a pre filter or a Bobby. They vary in length depending on the size of the vessel being filled and they can be used multiple times. Save yourself a lot of time and hassle.

Also, test your source water to be sure of the Calcium levels. In some instances it may actually be better to fill the spa with soft water and add calcium.

Email sales@swimmingpoolservices.com with any questions regarding pre filters or any tips that you would like us to address in the future.
