Wax on Wax off

Tired of guessing how to clean an acrylic spa shell and make it shine like new? The surface of a hot tub is a unique acrylic that can not be cleaned and polished with any old product underneath sink! There are spray on cleaners that can be used with a cloth or very mild grit brush. To finish the acrylic cleaning process, wax or polish the shell at drain and refills. This will prevent scum buildup on the exterior. If you do manage to get some scaling, it will wipe off so much easier if the shell was waxed. Aside from those reasons, it looks a lot nicer and water spots will not form.

Email sales@swimmingpoolservices.com with any questions regarding spa shell cleaning or any tips that you would like us to address in the future.
