Wetter water is better water

Southeastern Wisconsin water is full of calcium and generally feels hard. Take this water and put a couple hundred gallons in a spa, add heat and try to use it over and over while maintaining sparkling water! Spa Silken buffers the water so it stays balanced and reduces the likelihood of cloudiness and other problems. The best benefit of Spa Silken is felt while in the spa, the water feels wetter! When you leave the spa it will feel like you put on lotion. Silken is borate technology that will also cut down on red eyes. This product works with all sanitizer systems and seriously enhances every spa experience.

Come to Spa School September 23, 2010 held in the SPS educational center. \$100 gift certificate will be given away, free drinks, free snacks and free knowledge. Call or e-mail us to reserve your seat.

Email sales@swimmingpoolservices.com with any questions regarding spa water silkiness or any tips that you would like us to address in the future.
